## What is a Cryptocurrency?

A **cryptocurrency** is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering

**Cryptocurrencies** influences blockchains technology between two connection for decentralization, transparency and immutability. We are in team with experts around the world who are professionals in trading and minings and also has the best analytical skills, the team guarantees best services and makes sure profits are generated on a daily basis.
